

Bimetal Radiator

YM-S350

YM-S500

YM-S500A

YM-S600

1. Our bimetal radiator is produced of high quality aluminium and steel, so its durability is ensured. The steel is the preferred material for acid base containers and pipelines. Its high preservation and antioxidant capacities eliminate the need for anti-corrosion coating, which puts an end to the leakage caused by anti-corrosion coating.
2. The steel pipes used in heaters and heating systems have many advantages. Acid steel is antirust, corrosion resistant and is harder

than brass and aluminum materials, making it suitable for different conditions of water quality.

3. Our bimetal radiator is manufactured using sophisticated technology and top grade machinery. Hence, it is high quality.

4. Due to its high quality and reliable performance, the heat dissipation capacity of our radiator is greatly increased.

5. Economically priced, our radiator is an ideal choice for residential heating

Technical Parameters of Bimetal Radiator

Model	dimension (mm)	Central distance (mm)	Working pressure (Mpa)	Max pressure (Mpa)	Thermal output (W)	Weight (KG)
YM-S350	413*80*80	350	2.4	4.6	126	1.43
YM-S500	560*80*80	500	2.4	4.6	168	1.68
YM-S500A	560*80*80	500	2.4	4.6	168	1.7
YM-S500B	560*80*80	500	2.4	4.6	150	1.38
YM-S600	663*80*90	600	2.4	4.6	202	2.1

Youmay, a Chinese domestic radiator manufacturer and supplier, specializes in die casting aluminium radiator, bimetal radiator, heater, and more. Through our about 30 years of experience and continued efforts, our radiators are reliable, economical, and are CE, ROHS certified. As a result, they are well received by customers in Russia, Eastern Europe, Spain, Greece, Iran, and other countries.

Whenever you have a need for Youmay heater, please don't hesitate to contact us!
